

2001 Schedule

IBM @server iSeries Technology Teleconferences

The IBM @server iSeries Technology Teleconferences will feature topics that AS/400 and iSeries I/T professionals will find valuable in order to take the lead in web-enabling their companies. Today, business computing demands more than the ability to run core, mission-critical applications. e-business is challenging companies with complex workloads and new customer demands. Companies are turning to IBM @server iSeries technologies and solutions to help them get up and running faster and stay up and running with less work. Join us for complimentary teleconferences to learn about the very latest iSeries solutions and technologies.

To register for teleconferences call

1-800-289-0579

and reference the confirmation code(s)
for the event(s) you would like to attend.

Participation is easy. Call our registration line to enroll for any of the teleconferences listed. Upon registration you will be given a phone number to call on the day of the event. Q&A sessions will be included with each teleconference, so you can get your questions answered quickly.
